

$[-2, 3]$

$[-4, 5]$

mul

```
graph LR; A([-2, 3]) --> C((mul)); B([-4, 5]) --> C;
```

The diagram illustrates a multiplication operation. Two input ranges, $[-2, 3]$ and $[-4, 5]$, are shown in light blue rounded rectangles on the left. Arrows from both rectangles point to a light gray rounded rectangle on the right labeled mul , representing the multiplication of the two ranges.
