

`[-8, -1, 0, 3, 7]`

`[1, 1, -2, 6, 7]`

`add qint4`

```
graph TD; A["[-8, -1, 0, 3, 7]"] --> C["add qint4"]; B["[1, 1, -2, 6, 7]"] --> C;
```

The diagram illustrates a merge operation. Two input arrays, `[-8, -1, 0, 3, 7]` and `[1, 1, -2, 6, 7]`, are shown in light blue boxes at the top. Arrows from each box point down to a central light orange box labeled `add qint4`, indicating that the elements of both arrays are being combined into a single sequence for a specific operation.
