

$[-2, 3]$

$[-4, 5]$

mul

```
graph LR; A([-2, 3]) --> C((mul)); B([-4, 5]) --> C;
```

The diagram illustrates a multiplication operation. Two light blue rounded rectangular boxes on the left contain the intervals $[-2, 3]$ and $[-4, 5]$. Arrows from both boxes point to a light gray rounded rectangular box on the right labeled 'mul', indicating that the two intervals are being multiplied.
