

x: f32[4]

+0

add
NSZ

```
graph LR; A(x: f32[4]) --> C(add NSZ); B(+0) --> C;
```

The diagram illustrates an addition operation with no saturation (NSZ). It features three nodes: a light blue oval at the top left containing the text 'x: f32[4]', a light yellow rounded rectangle at the bottom left containing '+0', and a light pink rounded rectangle on the right containing 'add' and 'NSZ' stacked vertically. Two dark blue arrows point from the left nodes to the right node: one from the bottom of the blue oval and one from the top of the yellow rectangle.
